

HEALTH CARE

(Mr. MARIO DIAZ-BALART of Florida asked and was given permission to address the House for 1 minute.)

Mr. MARIO DIAZ-BALART of Florida. Mr. Speaker, this 2,000-page health care bill is not a health care reform bill. It's a monstrosity. It contains three-quarters of a trillion dollars in tax increases on small businesses and the middle class, which will lead to more people losing their jobs. It contains half a trillion dollars in cuts to Medicare for our senior citizens. This bill increases the Medicaid costs on our already hard-hit States, which will inevitably have the result of cutting education funding and funding for our first responders on the State level. This bill actually increases the cost of health care, Mr. Speaker.

You know, the American people understand that this bill will make the Wall Street bailout, known as TARP, the government takeover of the car industry, and the failed stimulus pale in comparison.

Mr. Speaker, the American people have already rejected this bill. Congress needs to listen to them and do the same.

HEALTH CARE REFORM AND ABORTION

(Mr. CAO asked and was given permission to address the House for 1 minute.)

Mr. CAO. Mr. Speaker, health care reform is an issue of paramount importance, and we must be deliberative in solving the main question, which is: How can we make our health care system affordable, accessible, and accountable? Unfortunately, the health care reform forum has not been used to address the problem of affordable health care, but to expand the controversial issue of abortion.

When President Obama addressed a joint session of Congress on September 9, he said, "Under our plan, no Federal dollars will be used to fund abortion, and Federal conscience laws will remain in place." The health care reform plan presented by Speaker PELOSI does not reflect the long-standing policies that ban Federal abortion funding.

America needs responsible health care reform, and it should not be a vehicle for expanding the abortion agenda. The majority of the American people, including those in my home district of Louisiana, are against the Federal funding of abortion. Real health care is about saving and nurturing life, not about taking life.

HEALTH CARE

(Mr. ROGERS of Kentucky asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROGERS of Kentucky. Mr. Speaker, everyone agrees that health care is too expensive, and it is not af-

fordable to every American. Everyone also agrees that the American health system is the best in the world for innovation and invention. And polls have shown that most people are happy with their health care. That's why people from all over the world come here to receive health care.

So why are we talking about dismantling our great health system, one-sixth of our economy, and replacing it with a government-run health program that will cost \$1.5 trillion in borrowed money that will be paid for by our grandkids?

We need to work together to bring down the actual costs of health care. Republicans have such a plan: cap lawsuits, giving Americans a real choice by letting them purchase insurance across State lines, allowing small businesses and individuals to join together and pool to purchase less expensive coverage.

We need to keep the best system in the world. Don't throw the baby out with the bath water.

WHAT'S AT STAKE

(Mr. MCCLINTOCK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MCCLINTOCK. Mr. Speaker, Congress is about to make a decision that will impact every American for the rest of their lives. Simply stated, what's at stake is the freedom to make our own decisions about our own health care. PELOSI's bill forces every American to purchase our insurance through a government-run exchange. It forces us to purchase only those policies that meet all of the requirements set by the new health czar or be fined for failing to do so. And it forces us to pay for all the cost overruns through higher premiums or higher taxes.

Where does it all lead? In 1993, the government introduced a public option for student loans, but only a fraction of the public opted in. So last month, the House voted to give the government monopoly control over all student loans. That's about to happen to our health care unless 40 Blue Dog Democrats decide to stop them. Please, call them today.

HEALTH CARE

(Mr. MARCHANT asked and was given permission to address the House for 1 minute.)

Mr. MARCHANT. Mr. Speaker, the Wall Street Journal said it best, this bill may well be the worst piece of post-New Deal legislation ever introduced. My constituents of the Texas 24th District agree. They have told me loud and clear, time and time again, that they do not want this government takeover of our health care system.

This legislation creates 111 new Federal programs, bureaucracies, commissions and boards; and this is just counting the ones that are in the original

bill. I am sure that when the manager's amendment is introduced, there will be many more.

We need a patient-centered approach to health care reform. We do not need to mortgage the future of our children by saddling them with a \$1 trillion debt. Let's not punish our seniors, our families, and our grandchildren by passing this bill.

HEALTH CARE

(Mr. NEUGEBAUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NEUGEBAUER. Madam Speaker, there is a difference between the right way and the wrong way on health care reform, and the American people know it. Results from a survey on my Web site just came back the last few days. We asked the question what the people in the 19th Congressional District thought about their current health care system versus the one being proposed by Speaker PELOSI. Eighty-eight percent of the people who took my survey believe that their current health care system is better than the one in this bill. Speaker PELOSI, this is the worst bill ever.

H.R. 3962 will cost \$1.2 trillion over the first decade, and that's after using some smoke and mirrors with the numbers, not the \$894 billion that the Speaker claims; or, simply put, this is bending the cost curve in the wrong direction.

This bill permits Federal programs to be spent on abortion services. It includes a government-run plan that will force tens of millions of Americans off their current coverage. In navigating the new health care system, the bill creates 111 new programs and bureaucracies. These are not the positive solutions the American people are looking for.

Mr. Speaker, let's start over.

HEALTH CARE

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLF. Uncle Sam is saying, Don't let debt defeat a great Nation.

America is going broke. We must carefully weigh the implications of a costly new government spending program at a time when the country already owes \$56 trillion of entitlement obligations to China and to Saudi Arabia.

I am deeply concerned about the national debt, which has doubled since 2000 and is nearly \$12 trillion for the first time in history. Any plan put forward must control costs, not add billions of dollars to an already ballooning deficit.

America is going broke. Is this the legacy Congress wants to leave to our children and our grandchildren? Don't let debt defeat a great Nation.

BETTER WAY TO LOWER HEALTH CARE COSTS

(Mr. BOUSTANY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOUSTANY. Mr. Speaker, the Democratic leadership in Congress continues to push a flawed, massive government takeover of health care that is going to cost more than \$1 trillion. What's more, their health care overhaul will drive up health care costs for families and small business, and it will disrupt the doctor-patient relationship. States already straining under runaway budgets will be forced to cut services or to raise taxes when they're forced to raise Medicaid eligibility.

As a doctor, I saw the problems with our current health care system, and I saw the amazing innovation which makes the U.S. the envy of the world. Let's build on what works. We can achieve commonsense solutions in a bipartisan way, but the Pelosi health care bill focuses on where we disagree.

House Republicans put forward a commonsense plan to revitalize the American health care system—to lower costs for families and businesses and to improve quality. Our plan puts patients first, and it puts doctors and patients back in control of decision-making. Our plan makes health care more affordable and more accessible, with patients being able to see the doctors of their choice.

We can do better. Adopt the Republican plan.

HEALTH CARE

(Mr. CONNOLLY of Virginia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONNOLLY of Virginia. Mr. Speaker, of course there is no Republican plan for health care. I rise today to discuss the unconscionable economic cost of doing nothing, which is their plan.

Without health insurance reform, small businesses will pay \$2.4 trillion in health care over the next decade and up to \$800 billion in additional costs to them. Without reform, health care costs will rise from 18 percent of GDP today to a staggering 34 percent by 2040. Without reform, government spending on Medicare and Medicaid will nearly triple from 6 percent of our GDP to 15 percent of our GDP by 2040. Without reform, Federal, State, and local governments paid \$42.9 billion in 2008 to reimburse the costs of uninsured visits to emergency rooms, placing a tax burden of \$627 a year on every family in America, and that, without reform, will triple by 2030. Without reform, Mr. Speaker, the average employer-sponsored health insurance family deductible grew almost 50 percent from 1999 to 2006.

These are unconscionable cost increases, and we cannot sustain them. We need reform now.

HEALTH CARE

(Mr. CAMPBELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CAMPBELL. Mr. Speaker, one of the more Orwellian aspects of the Pelosi health care bill is that, amongst its 1,990 pages, it uses the word "shall" 3,425 times. That is 3,425 times that this bill compels somebody somewhere to do or to not do something, and that doesn't even include several hundred mentions of the word "must" or "require."

Yet, with all of those compulsions in there which are telling Americans what to do, there is an interesting use of the word "may," and that's relative to Members of Congress—to us. We may be a part of the government option, not must, not require, not shall, but we may participate in the public option—in the so-called public option—or in the government-run health care plan.

It is another case where this Democratic Congress is saying, Do what I say, not what I do.

HEALTH CARE

(Mr. SCHOCK asked and was given permission to address the House for 1 minute.)

Mr. SCHOCK. Mr. Speaker, last night, I hosted a town hall back in my district with over 1,000 of my constituents in attendance. I felt that was a better use of my time than was rushing back to this Chamber to vote on resolutions honoring dogs.

The final question of the night last night came from a 9-year-old constituent in my district named Joshua who asked me a very simple question: Do you support what President Obama wants to do with health care?

I told Joshua that I spent the first 9 months of my term in office trying to figure out exactly what it is the President wants to do on the issue of health care.

It is precisely this confusion of goals, of conflicting messages and this lack of communication from the majority which has all Americans still trying to figure out what exactly the President wants versus the Speaker of the House's bill before Congress.

We need to do this right. It's too important to get it wrong, and Republicans, Democrats, Independents, and the American people deserve to be in the room.

HEALTH CARE

(Mr. MANZULLO asked and was given permission to address the House for 1 minute.)

Mr. MANZULLO. Mr. Speaker, we've been advised that the House of Representatives may have only 3 hours of debate on this 1,990-page bill plus, perhaps, another 1,000-page manager's amendment. That comes out to \$500

billion an hour which will be spent of the public funds.

We should be debating this bill for weeks and months so that the American people know exactly what's in it and so that Members of Congress can be very exact in explaining it to our constituents and so that we can learn how deep and broad this bill is. In fact, there is even a provision which provides for reimbursement to veterinarians. Perhaps it's a mistake in the bill, but that's why we have to read it thoroughly.

HEALTH CARE

(Mr. MCCARTHY of California asked and was given permission to address the House for 1 minute.)

Mr. MCCARTHY of California. Mr. Speaker, when I listened to thousands of my constituents on tele-town halls this past summer and held town halls with 5,000 constituents in August, the overwhelming and consistent message they told me was to find real solutions.

My constituents told me we need to improve health care, but H.R. 3200 is bureaucracy; it's deficit spending; it's taxes; it's intrusion into the personal health care decisions between our doctors and ourselves moved in the wrong direction.

I don't think any one of my constituents told me that Congress needs to double down on H.R. 3200, but that's what the new 1,990-page Pelosi health care bill is. It is version 2.0 in the government's taking over of the health care of Americans. It creates government bureaucracies that make health care decisions for us. It costs over \$1 trillion, and it uses Medicare cuts on seniors and new taxes on Americans and small businesses to pay for them.

We want solutions that will give us the ability to purchase health insurance across State lines. We want solutions that will help people who can't get insurance because of preexisting conditions. We want solutions that don't use Medicare to pay for non-Medicare spending, and we want solutions that will control health care costs.

HEALTH CARE

(Mr. CAMP asked and was given permission to address the House for 1 minute.)

Mr. CAMP. Mr. Speaker, the Democrat bill we may be voting on later this week is not the prescription for what's ailing this country.

The CBO, the Congressional Budget Office, confirmed the Democrats' bill spends well over \$1 trillion, far more than even the President asked for. Nearly half of the people who get coverage in the bill will get it through Medicaid. This isn't health care reform. It's welfare expansion. It's the expansion of a program that is already financially unsustainable and that is crushing State budgets.

The Democrats' bill includes more than \$700 billion in tax increases, many
